Hydrographentag

Agenda

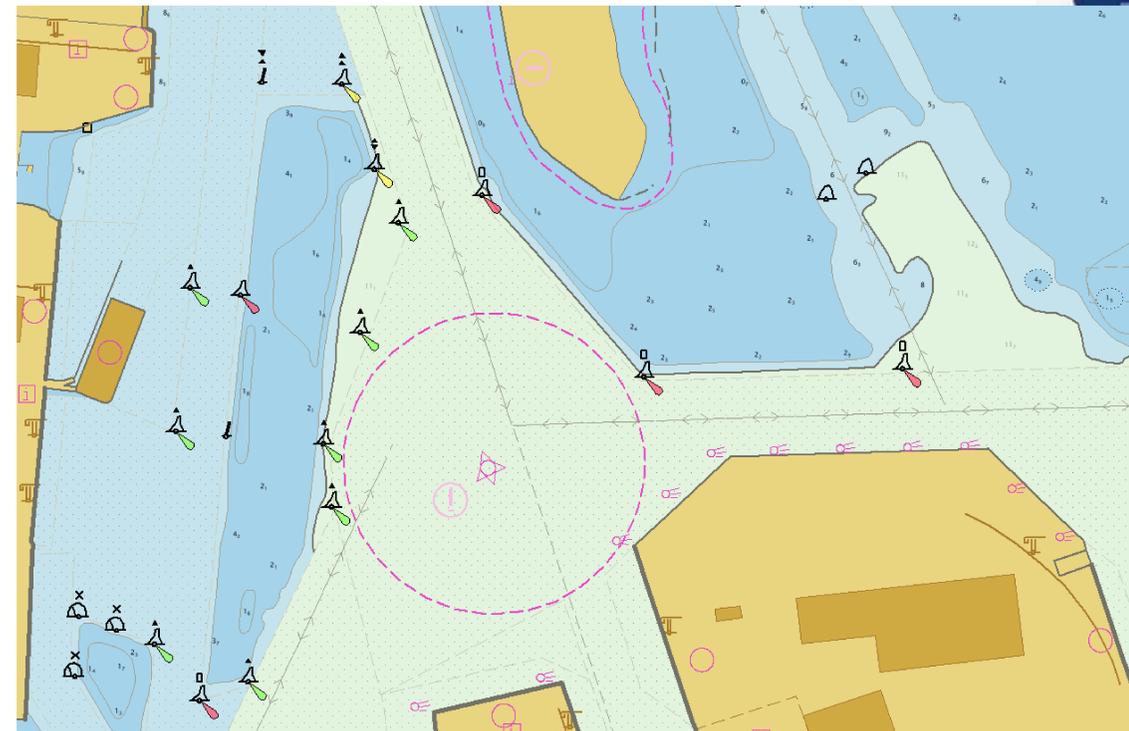

- **Introduction S-100 framework**
- **Future navigation with S-100**
- **Baltic Sea e-Navigation Project**

Introduction S-100 framework

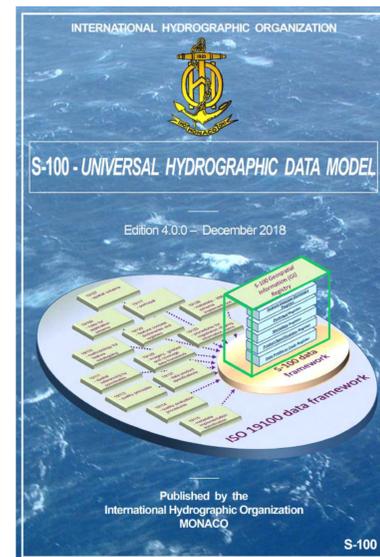

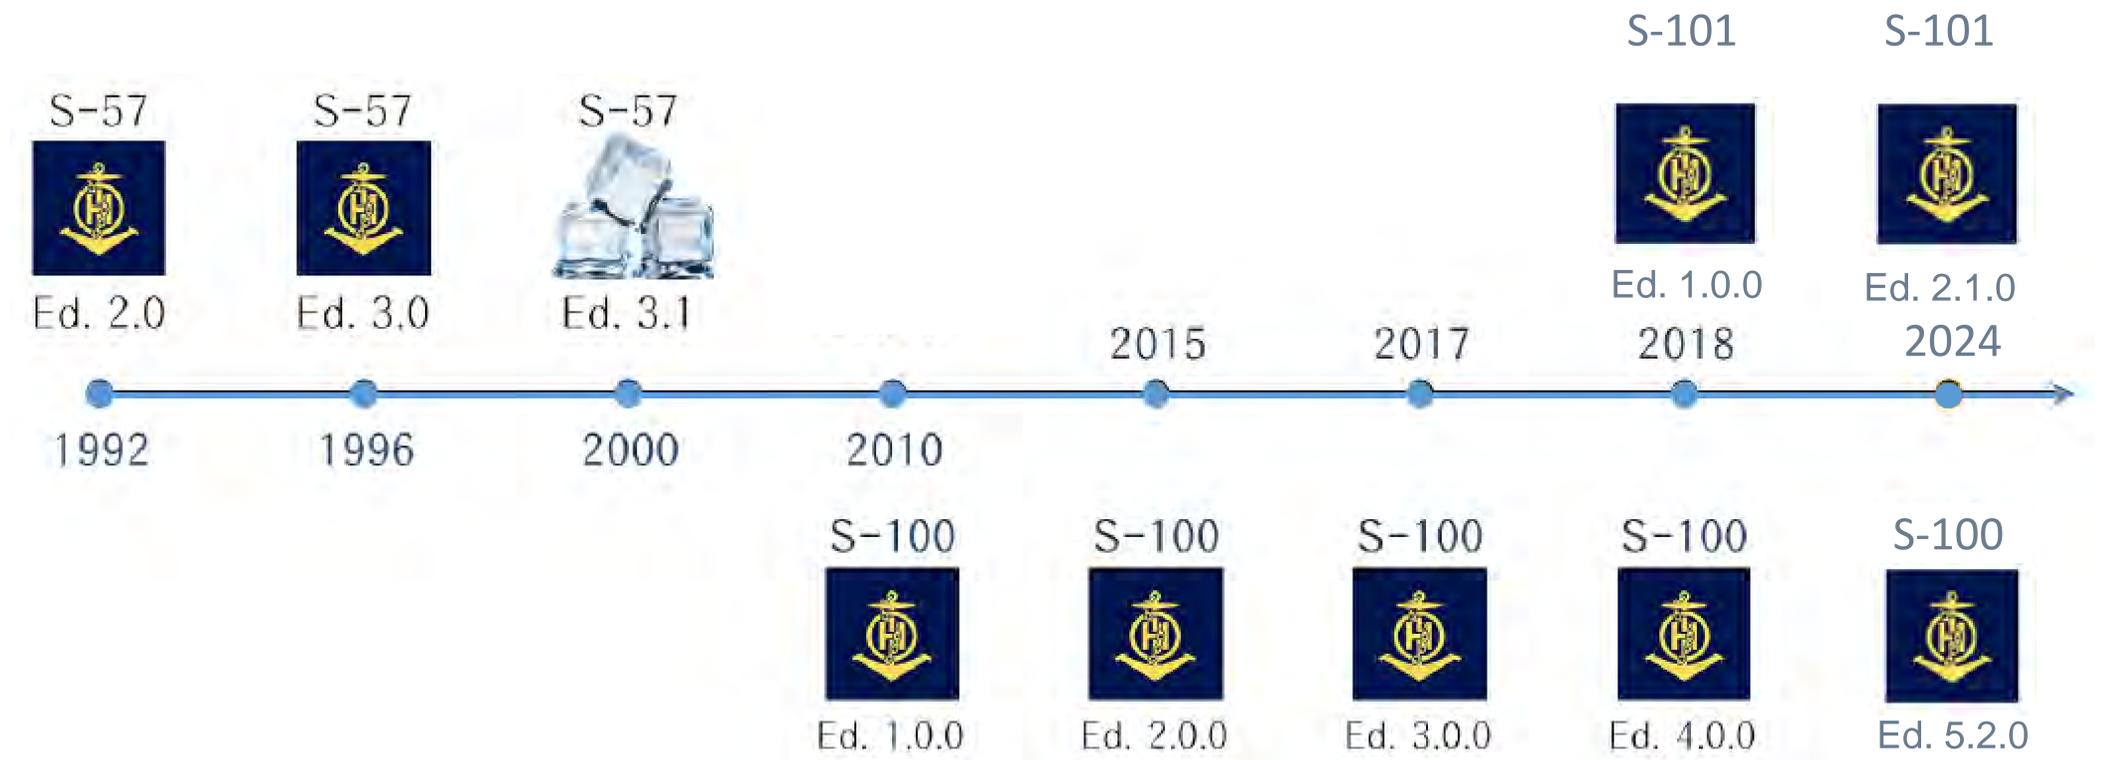

Paper chart

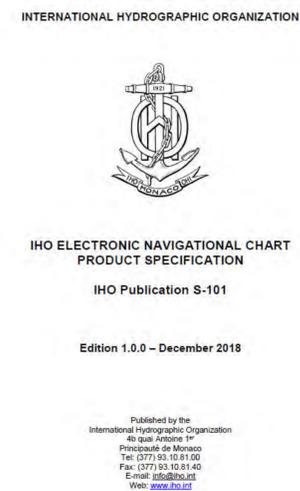

S-57 ENC

Introduction S-100 framework

**IHO Universal
Hydrographic Data
Model**

**S-101 ENC Product
Specification**

IHO
International Hydrographic Organisation

- S-101 to S-199**
- Electronic Navigational Charts
 - Bathymetry
 - Nautical Publications
 - Surface Currents

IALA
International Association of Marine Aids to Navigation and Lighthouse Authorities

- S-201 to S-299**
- AIS / VTS / ATONs

Inland ENC Harmonization Group

IEHG
Inland ENC Harmonization Group

- S-401 to S-410**
- Inland ENC
 - Inland Bathymetry

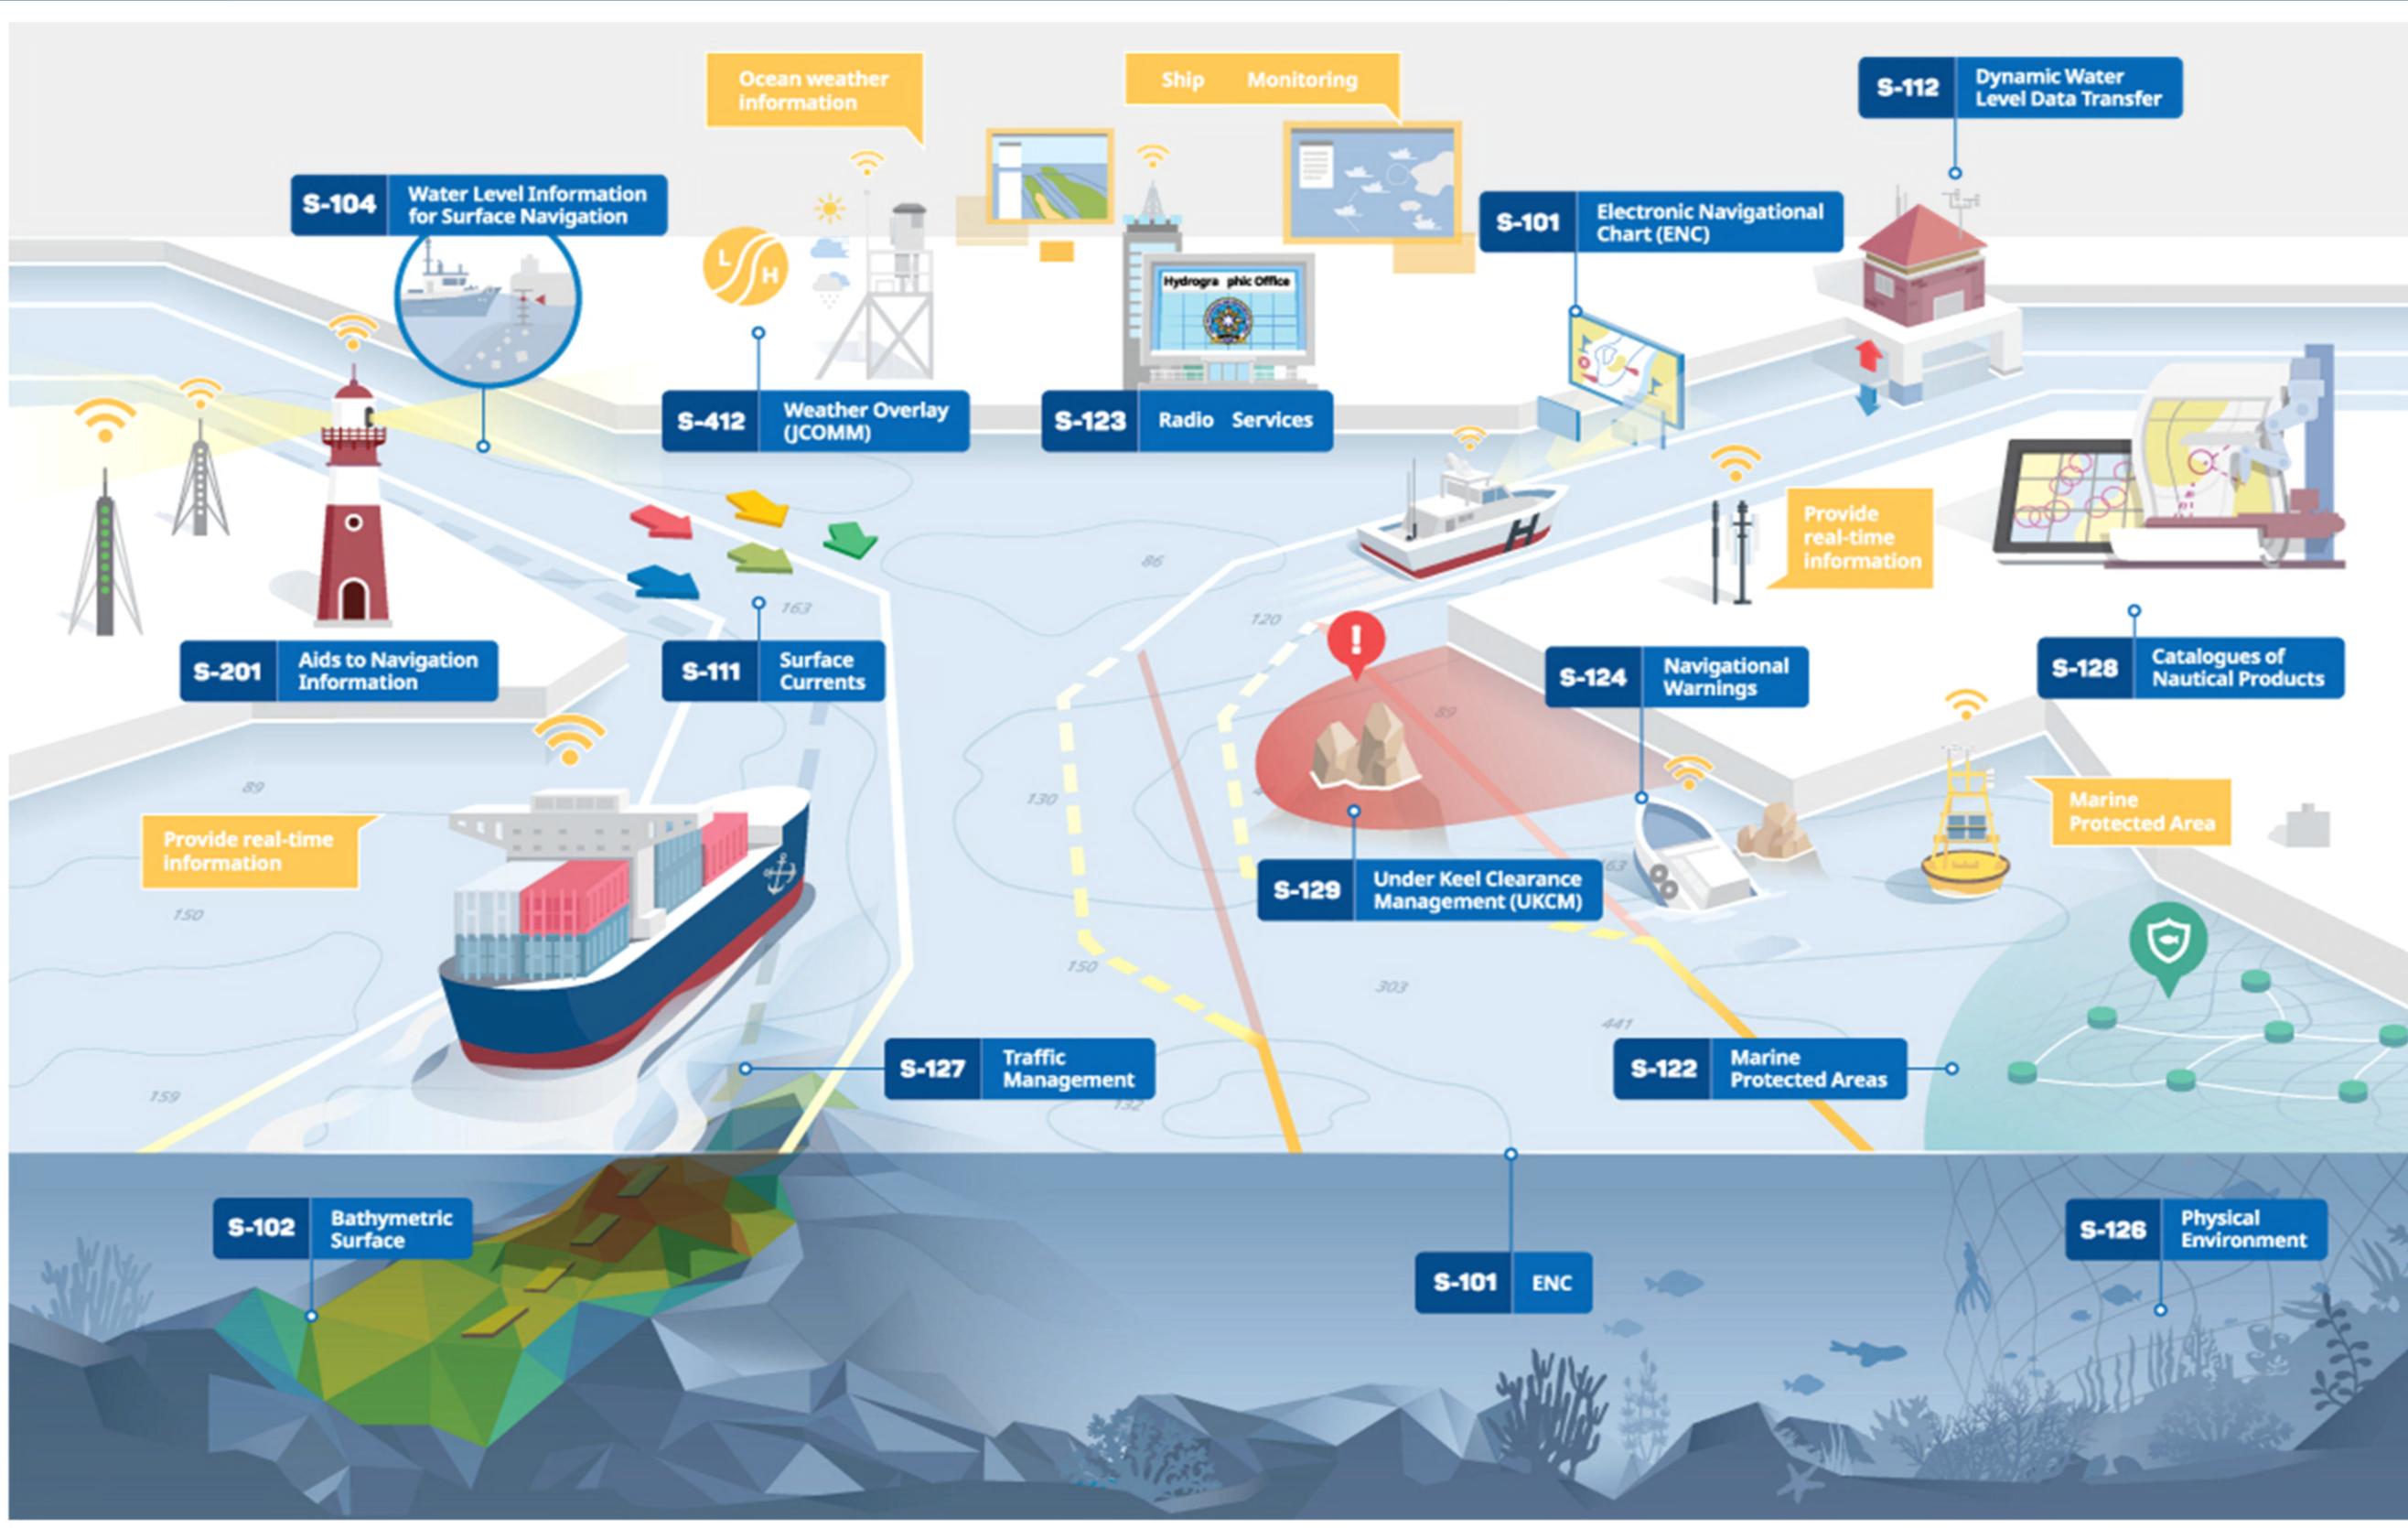

WMO
World Meteorological Organization

- S-411 to S-420**
- Dynamic Ice Information
 - Weather Warnings

IEC
International Electrotechnical Commission

- S-410**
- Route Plan

Introduction S-100 framework

Key Product Specification

Phase 1 / Route Monitoring

Phase 1 Route Monitoring Mode

- S-101 ENC
- S-102 Bathymetry
- S-104 Water Level
- S-111 Surface Currents
- S-124 Navigational Warnings
- S-129 UKC Management

Critical Framework

- IHO Geospatial Information Registry
- S-98 Interoperability Specification
- S-100 Universal Hydrographic Data Model
- S-128 Catalogue of Nautical Products
- S-164 Test Data Set for S-100 and ECDIS
Type Approval

Phase 2 / Route Planning

Phase 2 Route Planning Mode

- S-122 Marine Protected Areas
- S-123 Marine Radio Services
- S-125 Marine Aids to Navigation (AtoN)
- S-126 Marine Physical Environment
- S-127 Marine Traffic Management
- S-131 Marine Harbour Infrastructure
- S-411 Ice Information (WMO)
- S-412 Weather and Wave Hazards (WMO)

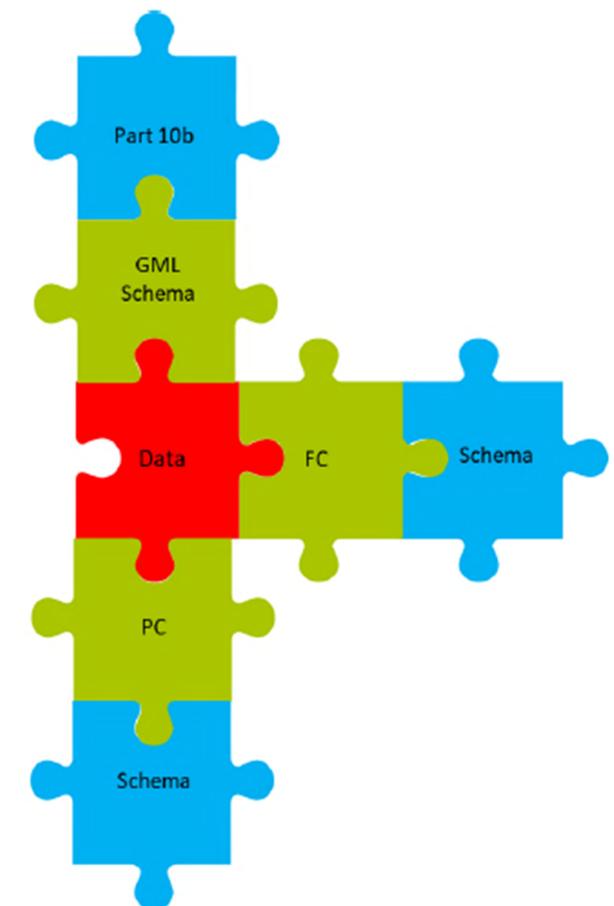

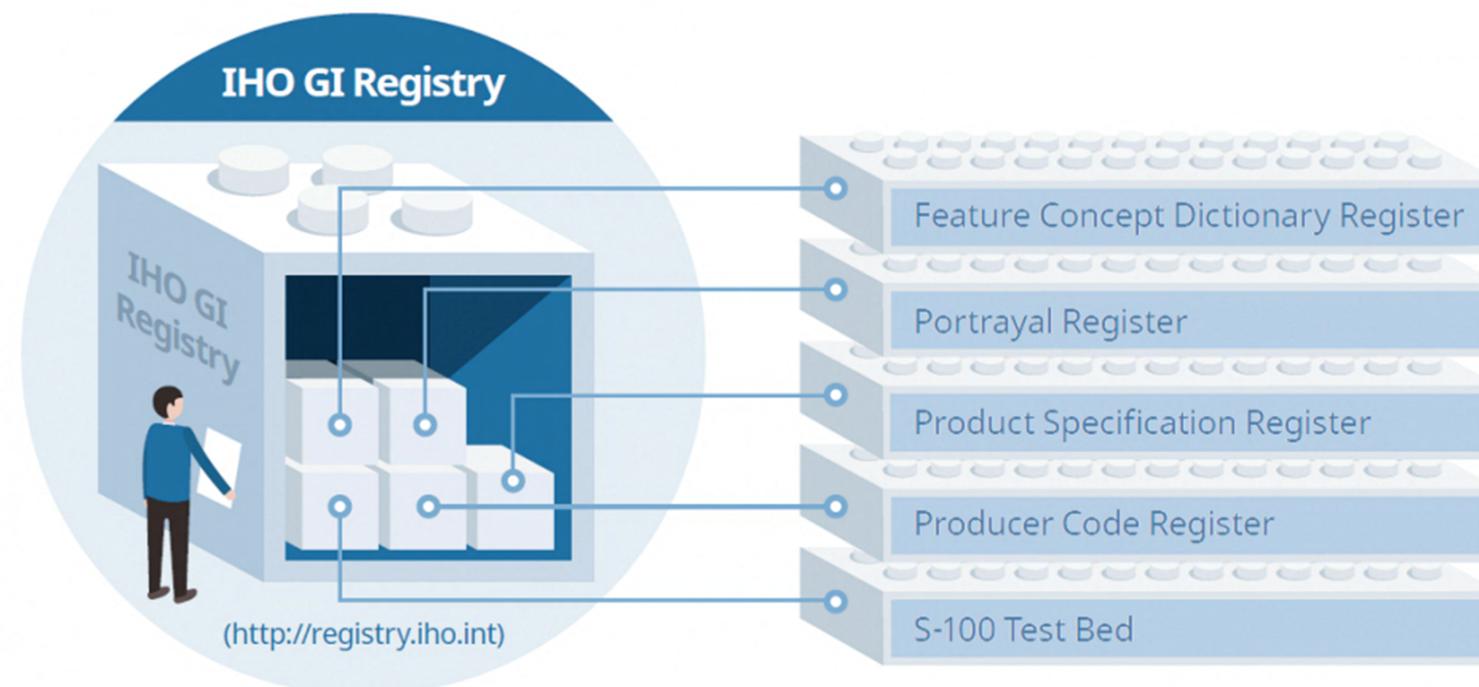

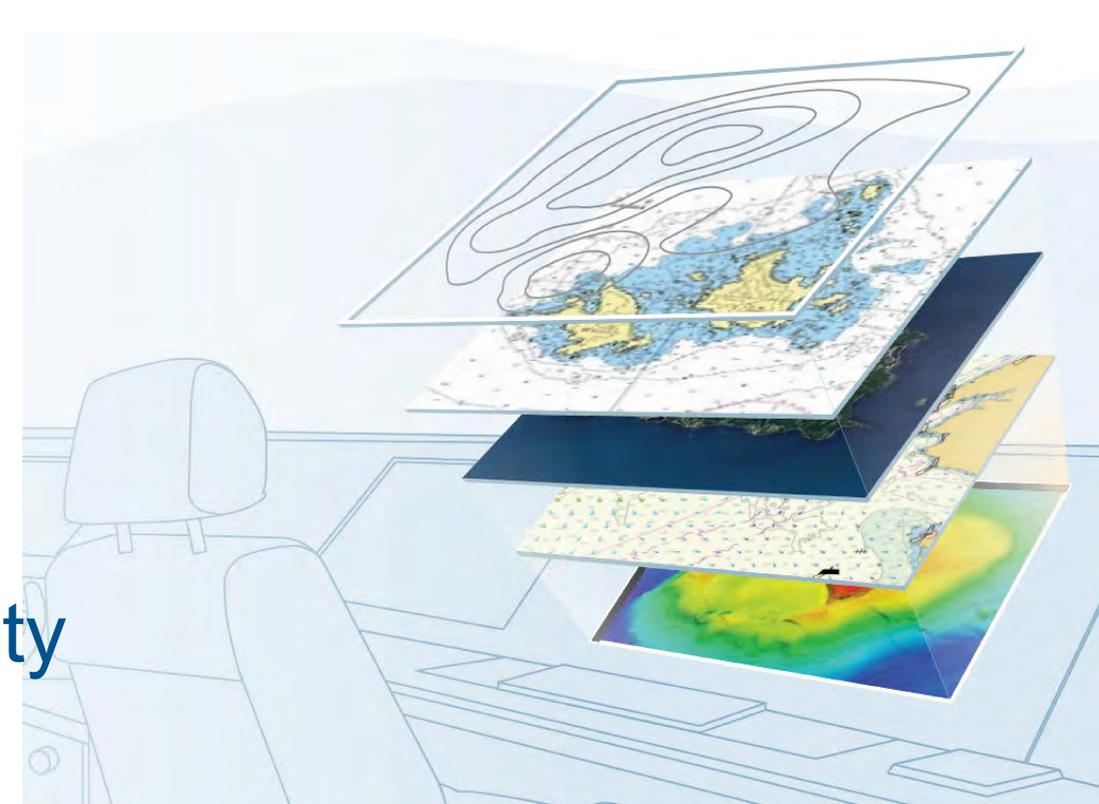

+ S-100 Products used in
Monitoring Mode

Introduction S-100 framework

Key Characteristics Why S-100 is a Game- Changer?

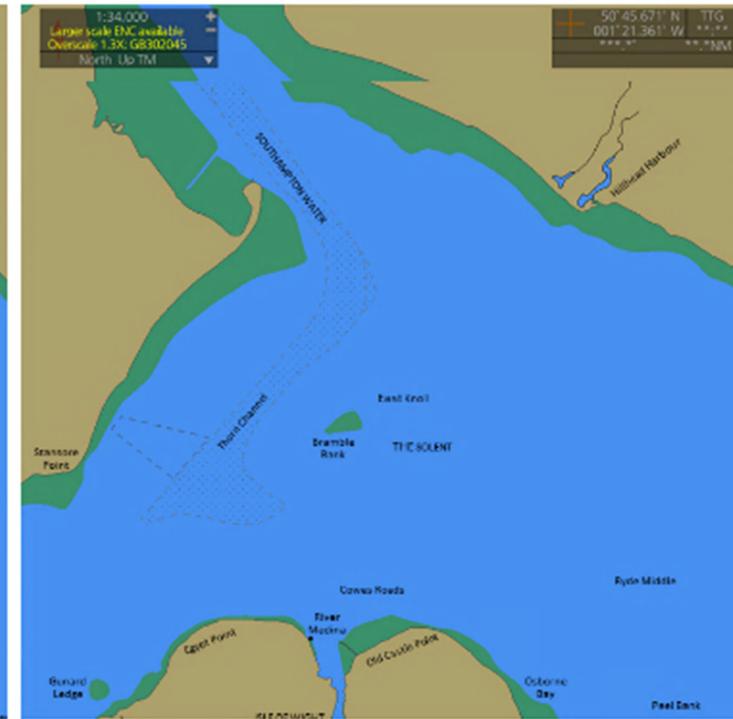

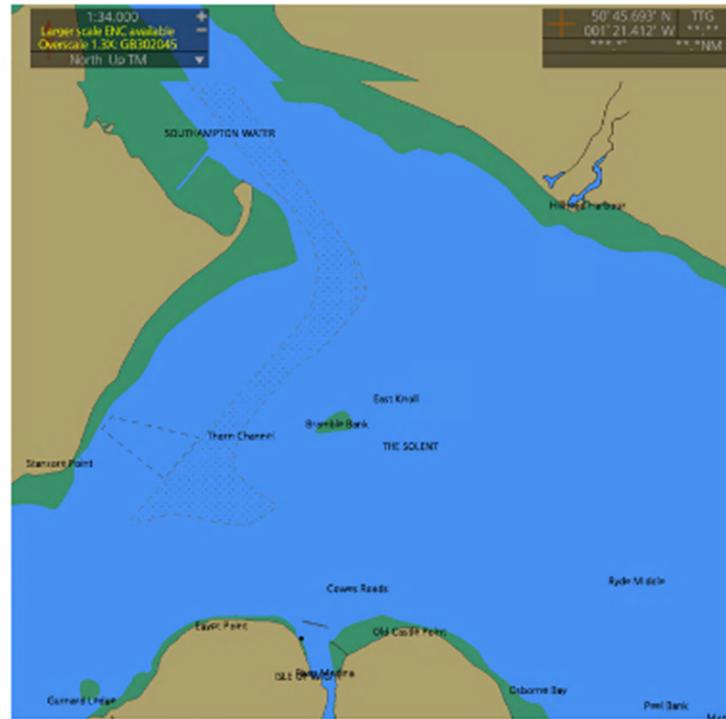

- Multi domain Interoperability
- Extensible, Modular
- Standardized Registry System

Text Placement

Testing example S-101 ENC + S-102 Bathymetry

Future navigation
with S-100

Safety contour 10m

13m

Future navigation with S-100

- Supporting safety
Multiple data layers into a single view
- Enhancing efficiencies
Combining critical information for more efficient decisions
- Optimising voyages
Fuel consumption, efficient voyage plan

IHO S-100 Implementation timeline

Roadmap for the S-100 Implementation Decade (2020 – 2030)

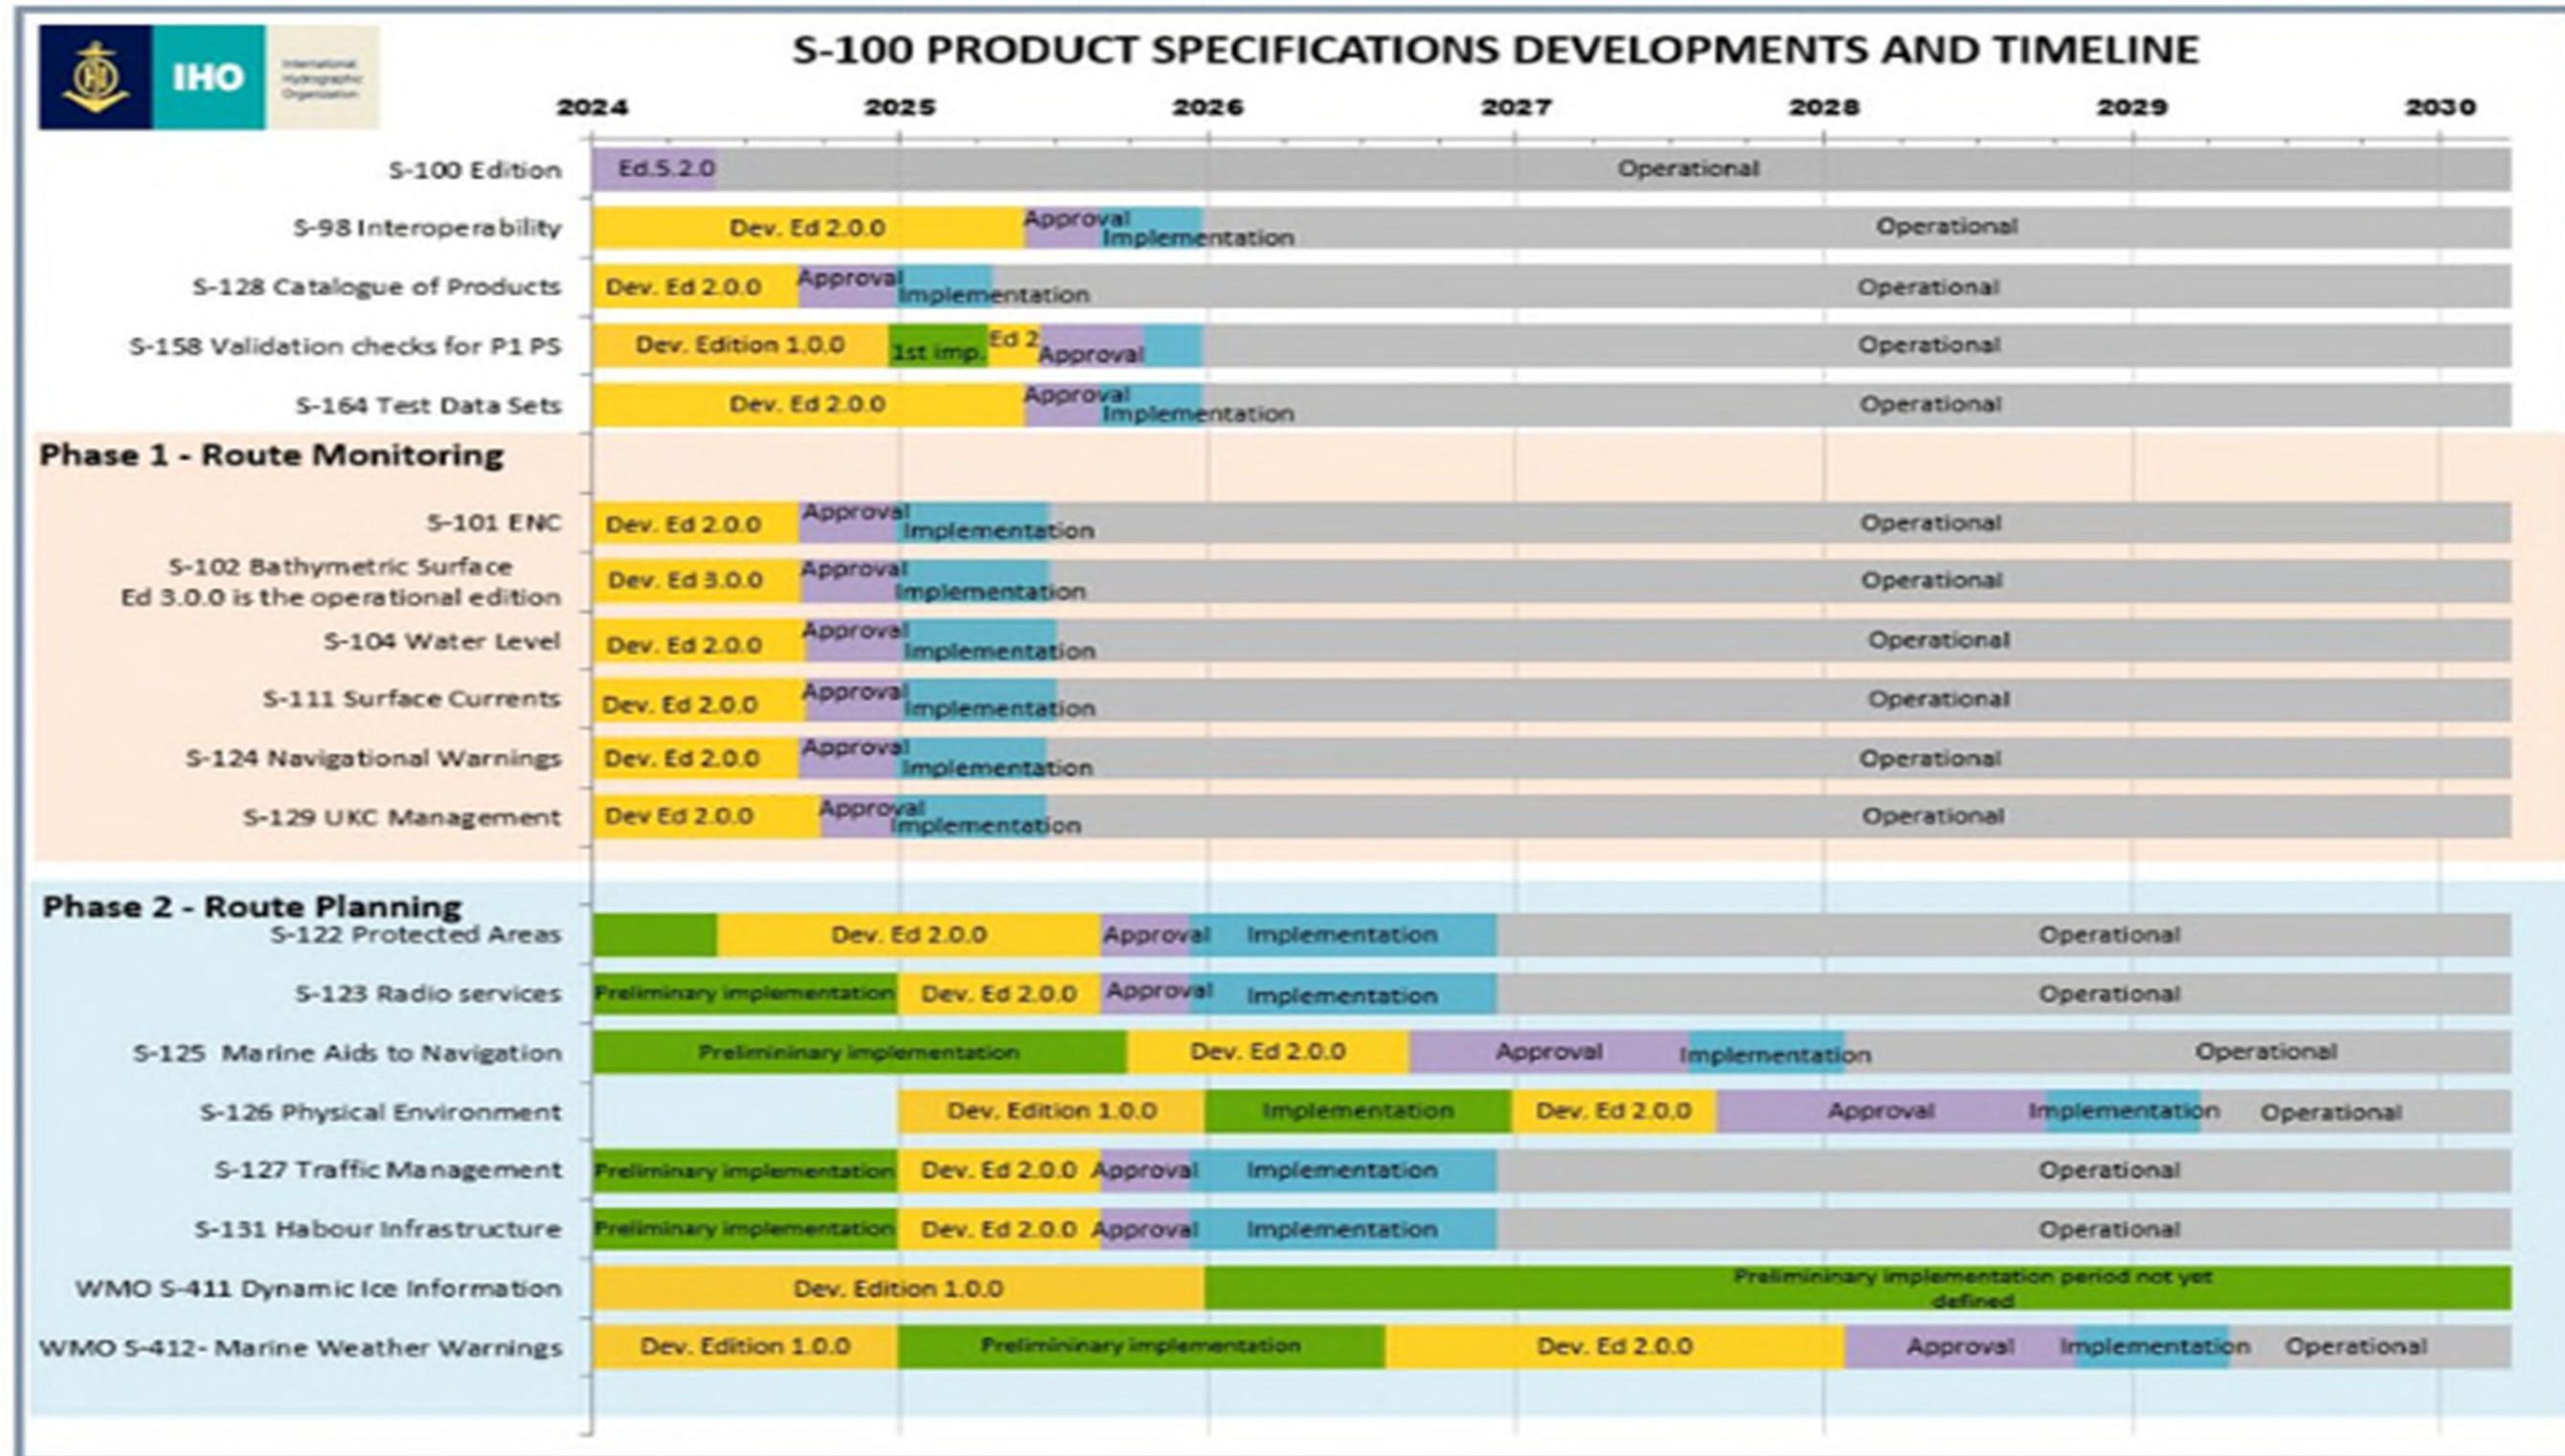

Amendments were made in IMO's ECDIS Performance Standards to incorporate S-100, approved by MSC in November 2022. **S-100 ECDIS can be used voluntary from 1 January 2026 and will be mandated in new installations from 1 January 2029.**

S-100 ECDIS Requirements:

If used for SOLAS chart carriage, an ECDIS must be:

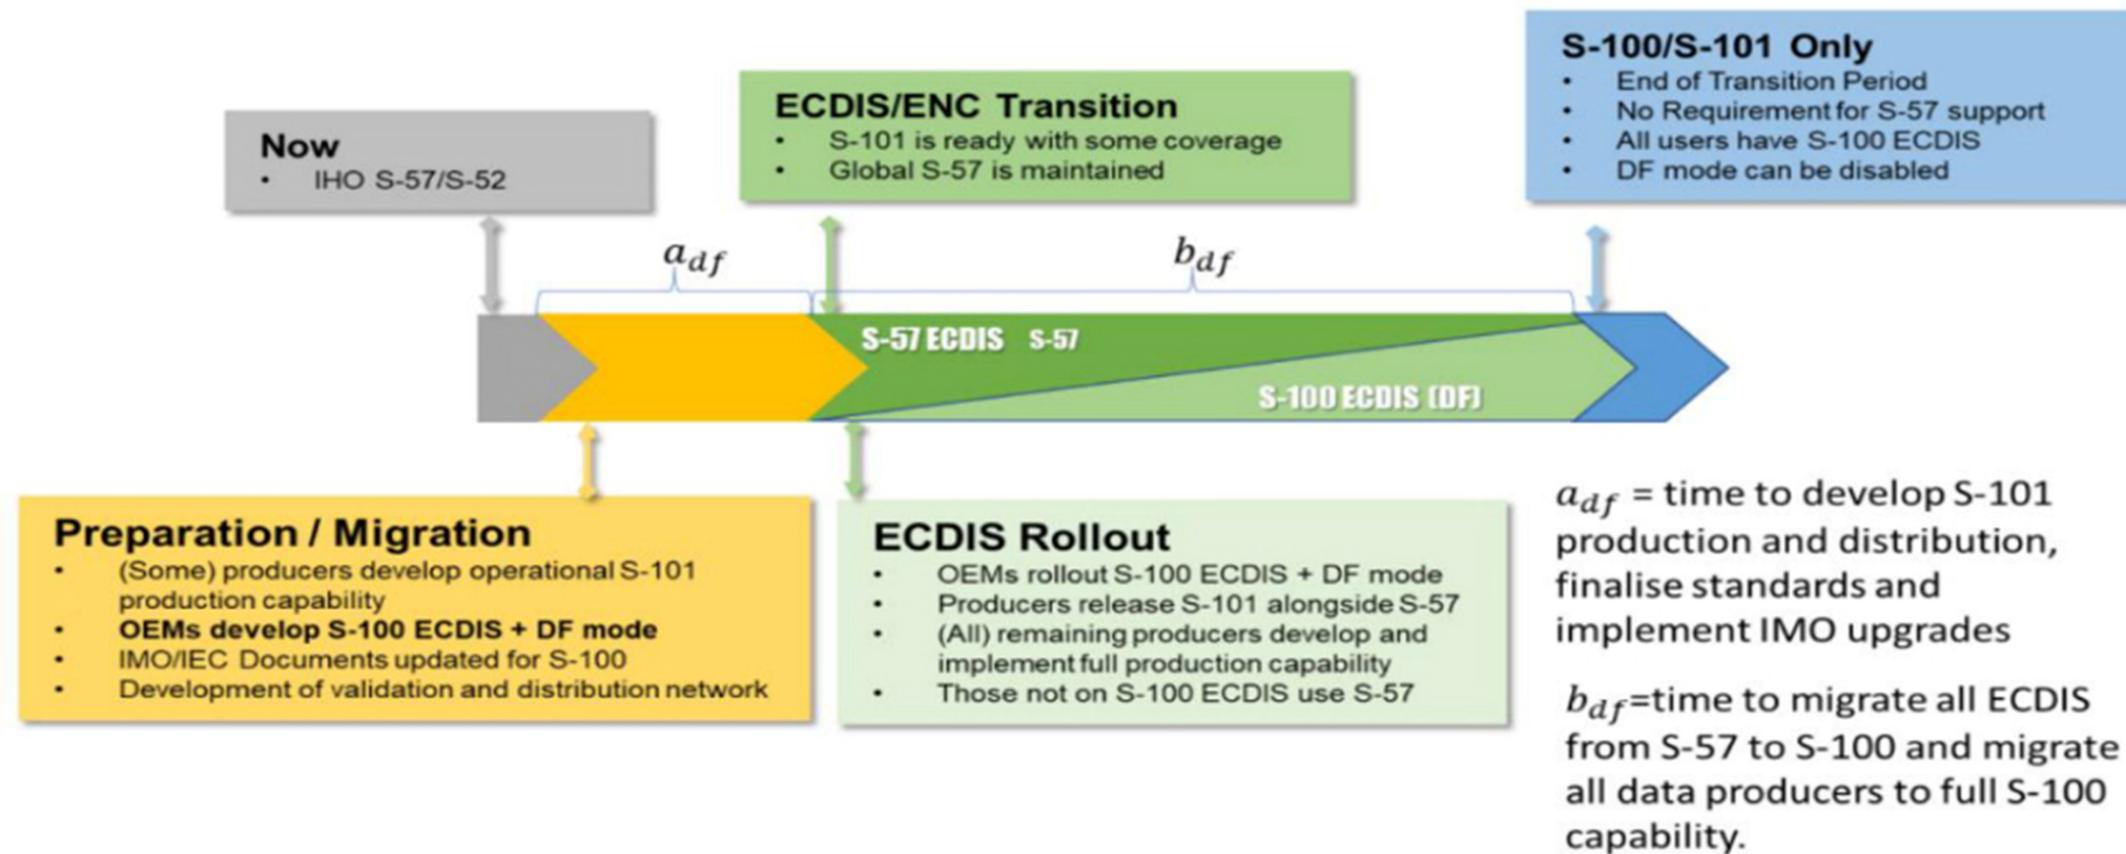

- Type-approved
- Use up-to-date Electronic Navigational Charts (ENCs)
- Maintained to be compatible with the latest applicable IHO Standards
- Have adequate, independent back-up arrangements in place

IHO S-100 Implementation timeline

Dual Fuel

Future navigation with S-100

Baltic Sea e-Navigation

Shared waters – same standards

Project Partners

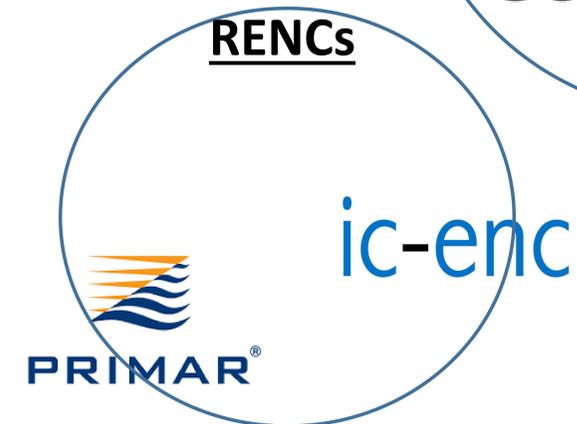

ECDIS Manufacturer

Research Institution

RENCs

The project is expected to benefit primarily the hydrographic offices, who are the main target group. Its goal is to work collaboratively advance our production in line with the IHO's implementation plan, ultimately enhancing shipping operations in the Baltic Sea.

Baltic sea e- Navigation Shared waters – same standards

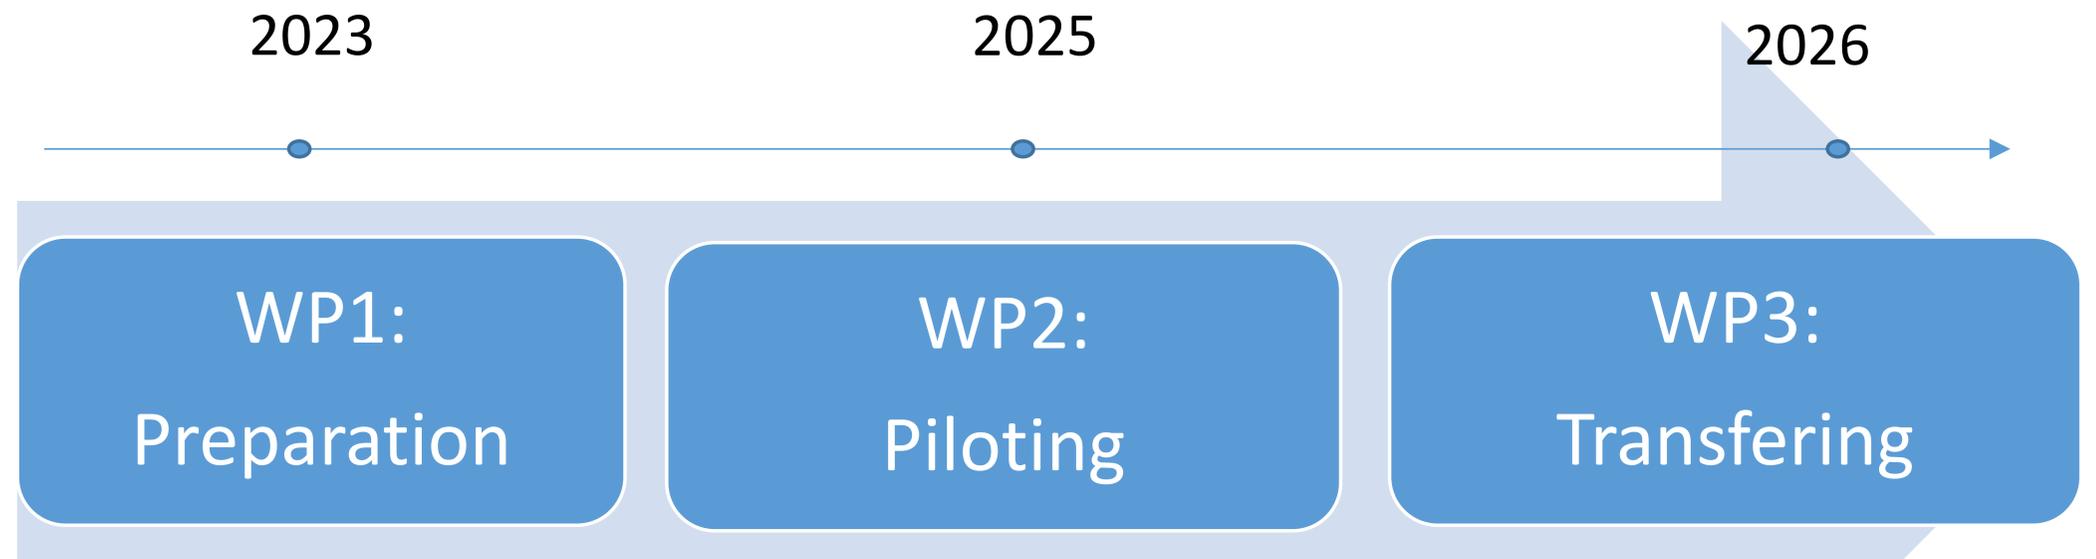

Project Goals

- **Develop production capabilities** for S-101 ENC, S-102 bathymetry and S-104 water level (2023–2025)
- **Test, evaluate and refine** the S-10x products (2025)
- **Commercial rollout** for S-101 and S-102 in the Baltic Sea (2026)
- **Establish harmonization rules** for S-10x-products, under the BSHC umbrella (2024–2026)

Baltic sea e- Navigation Shared waters – same standards

Work Plan

Preparation of solutions

- Develop production capabilities for S-101, S-102 and to some extent S-104 and S-111 Preparations for testing and evaluation
- Define testing scenarios

Piloting and evaluating solutions

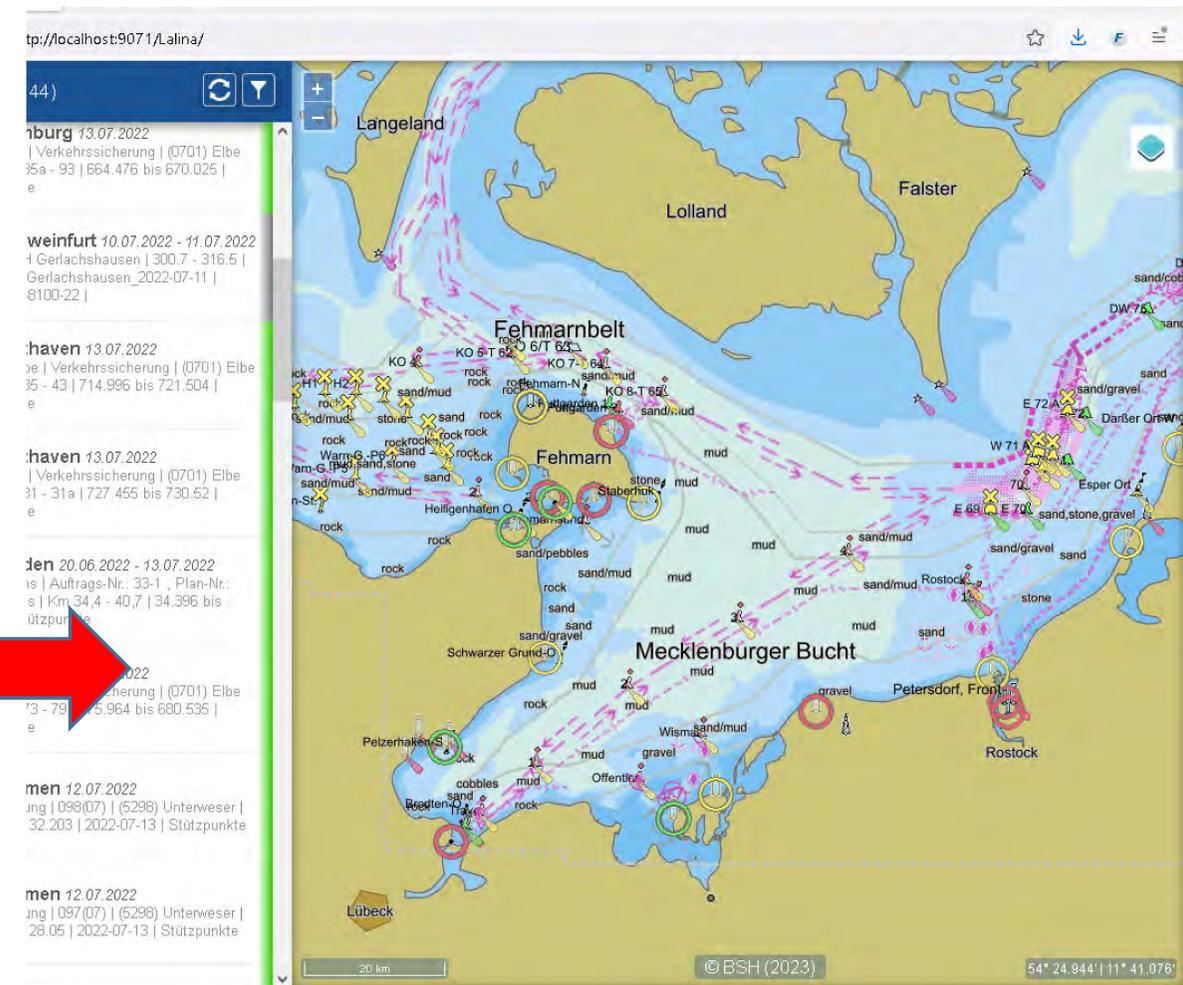

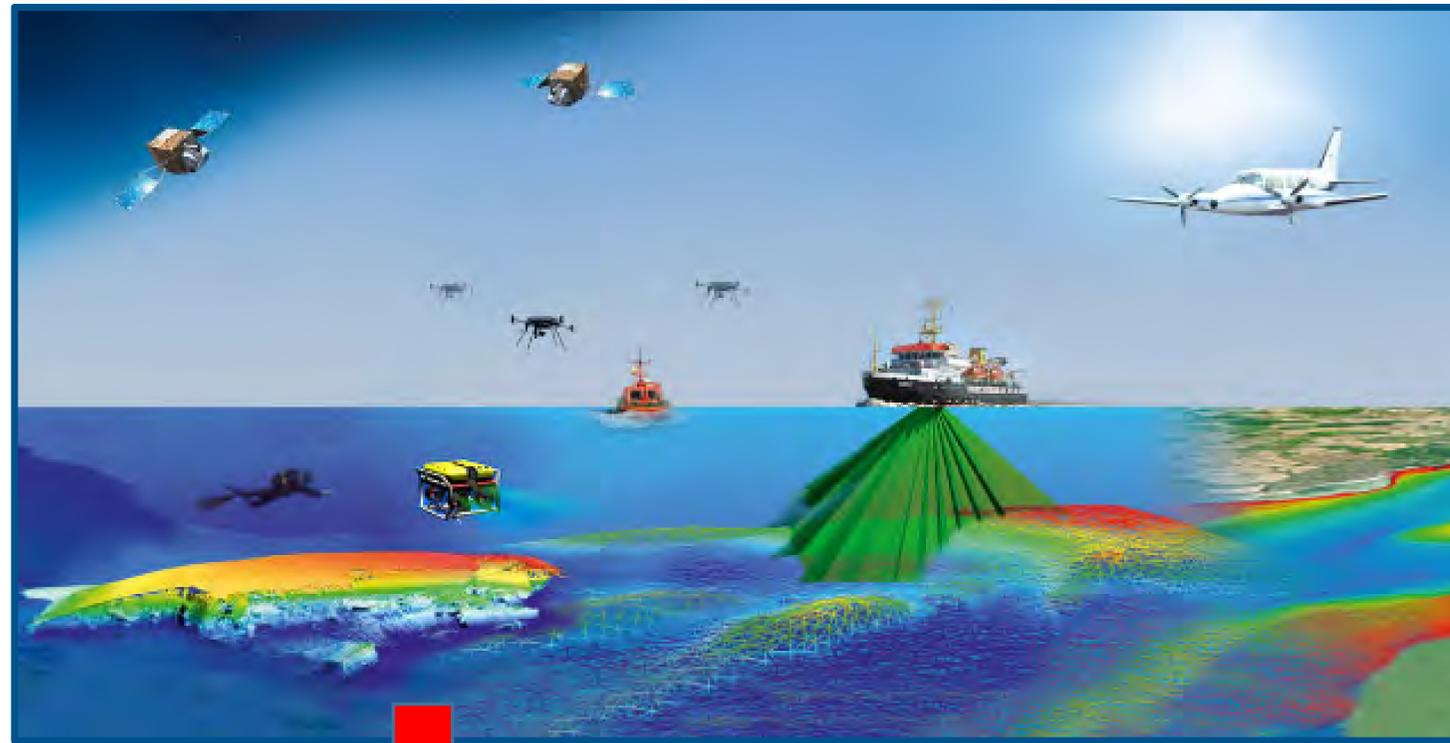

- Test, evaluate and refine S-1xx products
- Establish harmonization rules under the BSHC umbrella

Transferring Solutions

- Roll out S-101 and S-102 in the Baltic Sea.
- S-104/111 in parts of FI.
- Regional governance structures

Baltic sea e- Navigation Shared waters – same standards

Work Package 1

Baltic sea e- Navigation Shared waters – same standards

Work Package 2 Piloting

S-100 Transition

Key challenges and Germany's role in the Region

Challenges

- **S-100 data distribution infrastructure**
- **Stakeholder training**
- **Technical implementation**

Germany's Role in S-100 transition

- **Data production**
- **Standards development**
- **Testing**
- **Regional coordination**

Vielen Dank für Ihre Aufmerksamkeit!
